

S.No	Name	Feedback/Suggestion
01	Shri Sanjay Kumar, Anchal- Bankebazar, District- Gaya	It was said by them that due to sand lifting, the water level of the river has decreased and the ground water level has also declined, due to which the problem of drinking water is arising. Therefore, considering these problems, sand mining should not be done.
02	Shri Ashok Yadav, (Chief Association President) Anchal- Bankebazar, District- Gaya	Due to sand lifting, the water level of the river has decreased and the ground water level has also declined, due to which there is a problem of drinking water. People are also facing the problem of irrigation in their fields. Therefore, considering these problems, sand mining should not be done.
03	Mrs. Asmita Kumari, (Member of Sand Lifting Sangharsh Committee) Anchal-Imamganj, District- Gaya	The river is rainy yet the past three months sand mining work was done, due to which the depth of the river has increased, due to which River level fell below pan level which arises the problem of irrigation in fields. And on the roadside and tree plantation work in mining lease area has not done during mining and Mining work is done more than 3 meters. Therefore, considering these problems, a request was made not to allow sand mining work.
04	Shri Avadh Kishore Prasad, Village- Chaugai, Anchal- Bankebazar, District- Gaya	It was suggested by them that If sand ectraction is done then there will be problem of going water in pan. Public Hearing should be done by government before giving tender to sand-ghats.

		If the sand mining project is canceled then illegal mining will be encouraged. The government is requested to stop this and make sand available to the local people free of cost
05	Mohd. Qamar Khan, Former District Counselor, Anchal- Bankebazar, District-Gaya	It was said by them that arrangements were done first at the district level. sand mining The government gets revenue from the work, but this work has a heavy impact on the environment. There is loss in ground water level also drinking water has declined due to which problem is arising and people having problem of irrigation in the fields. So, considering these problems sand mining work should not be carried out.
06	During the public hearing, all the people present protested against signing the attendance register given as per the provisions along with their address and it was said that the protest given by us is attached with the report. The signed list will be valid and will be accepted by all the local residents present. A demand was made not to open the ghat. Because those people say that there is no sand in the ghat. A lot of sand has been mined out from here, due to which potholes have formed in the river at some places. In the past, mining work was done more than 3 metres. Due to which the level of the river has become lower than the level of the pan, due to which the problem of irrigation in the fields has arisen. All the people present also said that if the sand ghat becomes operational, they will go to protest against the government.
